THE mudersly ned would respectfully solicit the attention I of dealers in and consumers of Coal in Milwaukee to one Card, as above. The Bollvar Coal is unquestionably superior to any other muced in Ohio, for Grate, Blackemthing, Muchinery, or Domestic purposes; and for Steam purposes, is superior to any except Birar Hilli. It is peculiarly well adapted to Shipping, as its extreme hardness renders at capable of bearing any amount of landling, without waste. It can be afforded considerably cheaper than Brier Hill, and for most purposes, is better.

It is our wish to introduce the article, and we respectively solicit orders, confident that a trial is only necessary to convince any of the truth of the above assertion.

CROM OUR N. Y. CORRESPONDENT.

New York, May 21, '52. Our new Territorial acquisitions, consequent upon the Mexican War, of Utah and New Mexico, may turn out avergers of the unjust spirit and motives in which that War was entered upon.-I have ever believed that by an Lonest, conscientious and apright administration, the Mexican War might have been avoided, without the sacritice of any just right, or claim of the United States, and without any hazard to the ultimate peaceful extension of our territorial limits to the Pacific-California was as sure to fall within our sphereafter Oregon became ours by undisputed succesion-as Texas had so fallen; and the intermediate country would of course be included. But Slavery wanted an extension of limits, and therefore Texas was to be sustained, at all hazards, in its claims to the Rio Grande-and hence the War-Well, the penalty is now coming, over and above that of the treasure wasted and the lives-inestimable lives-sacrificed in the War. California indeed, with its golden tooks and sands, dazzles the vision and measurably perverts the judgment, in reviewing the events which led to its acquisition-but the troubles pending in Utah and New

Mexico are likely to soler the judgment again.

I have, in former letters, expressed the appre bension that the Morman Sect-fierce, fanatical and personned; and annually recruited by accessions from abroad-might, in their mountain fostnesses, from a seriously dangerous associate.— That danger is in no wise diminished, in my eyes, by the triumph which these lawless people have effected over the officers originally appointed by the Federal Government, to reside among them and to enforce the law of the United States .-Three Officers, obliged—so at least they plead to fly from their posts, have given place to successors of the Mormon-faith, I will not say-but interest. Beignam Young is appointed by the President of the United States, and confirmed by the Senate of the United States, Governor of Utah! The Mormon Prophet made the Civil Governor of a Territory of the United States by the President and Senate of the United States. This is not indeed a union of Church and State, but far worse, and the end is yet to be seen. So in New Mexico-the handful of Americans of our own race, in that Territory, is in danger from the overwiselining numbers of Mexicans, mixed breeds, and Indians. An appeal is made to Congrees for arms, and Congress dare not send arms, lest they should be turned against the authority of the United States and the citizens thereof, who have rights and homes in New Mexico.

Meantime Indian depredations are going on, and a long and heavy claim is accumulating against us under that clause of the Treaty of Guadalupe, which stipulates the guarantco of the U. S. to the safety of the Mexican frontiers agains Indian attacks and ravages. The economy of Congress has cut down below a living point the appropriations for the Army and especially for subsistence and transportation, which, in the sparsely settled region must be a heavy chargeand thus, by saving a penny now in prevention-is laying up claims for pounds in the way of damages. War, be assured, is always a calamity, life of man is played out in his few and feeble years of three score and ten; but the life of Nations expands thro centuries, and it is rately given to one generation to know the fruits of its own deeds, or misdeeds. Hence, while rejoicing as we of this day and hour are rejoicing, in the magnificent extension of our borders thro' the Mexican Wor and of the great future which our compire of the two seas and of the intervening continent foreshadows, we should rejoice in trembling; for over that future hang "clouds; and darkness? The Mormon difficulties and the Nev Mexico difficulties, are to be classed among those menneing glouds. A wise and fam band at the helm mby conjure, or disperse them—but a President seeking u, re-election with a chief officer of State seeking to supplant him, are not the parties who end, in such an emergency, be relied on for wisdom and firmness.

The Mortgage Veto.

The Racino Adrocate says, in talking of State offuirs and prospects:

Well for us that the Governor vetoed the lay well for its that the Covering retoed the law relative to mortgages, as that would have put a finishing stroke to the matter, and have induced capitalists to withdraw all the capital they had sent into the State as soon as possible, besides getting up a question that the Courts would have been compelled to consider, and have forced them been compensed to consider, and nave forced them to pronounce a law unconstitutional as an exposi-facto law, infringing the rights of contractors af-ter their contracts, had been made.

We recommend these remarks of the advocate to our contemporary of the Madison Democrat, who insists that nobody stands up in defence of the Governor s Veto, except the presses in the interest of the "Shylocks."

A YACHT PRIZE WORTH SAILING FOR .- At a re cent meeting of one of the London yacht clubs the secretary read a communication from the Rus aian consul, announcing the great regatta of St-Petersburg for June 27, in which royal yachts of all nations are invited to contend for a prize of 350 guineas, the race to extend from Cronstadt round the Neva Island. The letter was expressive of the warmest desire from the St. Petersburg Imperial Yacht Club that gentlemen of the Royal Themes Yacht Club would honor them by enter ing the Lists. The distance to be sailed is 160 nautical miles.

THE "FESTIVAL" GROUNDS. The band-ome grove, South of Spring Street,in which the "Mai Fest" is to be celebrated, has been prepared for the occasion with great faste and skill. The stand for the Music and the speakors is near the centre; booths and tents, heatly lecorated with colors and evergreens, surround the grove; just under the brow of the hill the targets for the "sharp-shooters" are placed; refreshments in abundance will be provided on the ground, and, in short, nothing has been left un-

one to make the Festival eminently successful. We hope to see a general attendance of our citiens, not forgetting the ladies, at the grounds. It has been suggested by many that the princial fixtures should be left in the Grove, to be used rain for the celebration of the Fourth of July,-We trust that this arrangement may be made and earn that a meeting will be called on the ground -day at half-past i o'clock, to effect it.

The dams at Lake Winnebago

The people at Fond du Lac and that neighbor ood seem to be in a state of great excitement clative to the manner in which their lands are werflowed by the high water in Lake Winnebago. We elip from the Fond du Lac Journal the following account of the last adjourned meeting :

following account of the last adjourned meeting:

The adjourned meeting to consider the subject of the rise of water in the lake, assembled at Oshkosh on Tuesday last. The subject was ably discussed by C. A. Eldredge, J. C. Truesdell, M. C. Durling, John Baunister, Buttrick, Geisee, and Whinfield, all of whom expressed their undoubted conviction that the great and prominent cause of the overflow of lands on the river and lake shore is the dams at Neemah and Menusha, and agreed in the opinion that these dams should be lowered.

A committee was appointed—Messrs. Truesdell, Darling, Buttrick—to confer with the committee who had conferred with the proprietors of the Dams.

lay (to-day) to procure an amicable adjustment of the difficulty, and to have the dams removed caecably—And in case of a failure, to summon he people together immediately to remove them

Mr. Jones of Neenah agreed to a proposition to lower his dam so as to give 400 feet more in lenth of tumble than now exists, or if that was not sufficient to remove until relieved, provided that the dam at Menasha, should be lowered to

that the dam at reconcerns should be reached the same level.

Mr. Reed of Menasha refused to hear any proposition, and treated the committee with indignity, contempt, und/definace, r. So that, as matters now stand, the issue is between the people and the Menasha dam. ["Query--is that the higher law?]

For the Senticel. MAY FRAST. CONCLUDED.

The Monday after Whitsentide holiday is dedicated to the pinxter-frolies. Almost every town even many villages in Germany have then townnooter companies, which Lold on this day their Whitsuntide target-shooting. This is a public feast day. The military companies turn out with music, and hold parade, the townshooter corn-

panies put forth large prizes for competition; he who happens to make the best but is proclaimed as the "shooters king" for the ensuing year, and while he is bound liberally to treat the company, he often is indemnified for these expenses by fine jewel as the winner's prize, or by the enjoyment of certain immunities, exemption from taxes loase of certain public property, &c., desired from legacies or donations which were made when princes and citizens in the old country, still liked to see the citizen, well armed and well used to their arms.

The population too is out; shanties, tent- and pavilions are built on the place of the festivel and dorned with green bushes; many families are iving this day and the following, in their own tents, which are erected for this purpose; grocers and sulcon-keepers embrace the rest. The Music is playing all day; young people are taking a walk, or playing at dice on the several stands, where cakes or toys or nips are diced out, others are partakers or spectators of the several public games. Many of these games are very humorous; good natured as the German folks almost all are, they little care whether on a general fiolic they may be laughed at and appear in a miler tidiculons situation, provided they may be at liberty just so to laugh at others and to see them in like situations.

There is for instant the cock-beating [Hahner chlagen.] The one who is at the port gets his eyes blindfolded, like blind roan's-buff, and a big flail or stick is put in his hands, while somehere in the circle he is led in, a rooster is put enenth an curthen pot. Now, there is joke enough to witness the curious mistakes, the sly novements, the uncertain efforts of the blindfold ed man, by trying to hit the pot and to win the poster. Many a one just reaching it with his foot fails to hit it, others confident just to have the ight direction, are quite in the wrong way, and o all the people are made merry by witnessing s well, the mistakes, as the good luck of the sportsmen. Others are catching a hog which i smeared over and over, so as to be hardly possible to be caught; others are climbing up a pole smeared in the same way, so that many a keen climber glides down before the golden watch at the top of the pole is reached by a successful

Then there are the singing club-, the brass bands playing all day, and the glee clubs, and the perormances of the gymnastical societies (Turners) and many other jokes and sports as the different quarters of the large country are in habit of. At the breaking of the night, large piles and pitch pans are kindled, and when at the end of the feast the "shooters-king" is proclaimed, he is escorted home in a very solemn way-the unsig the military companies, and the shooter companies leading the way, the hero of the day adoracd with

golden chain like a Roman triumphator.

Now, to-day the Germans try to acclimatize their homely festival in their new Lome; they will have their target-shooting, their glee-clubs, music, sports, jokes and good feasting like in their much-loved fatherland, but they never intended to make out of it a "German" feast-day They hope it will be hence and afterwards a "People's feast-day." They are quite sure, very however successful and glorious in its deeds and in its issue—and its consequences reach far beyond the sight, as beyond the lives, of those who provoke it. There was so comparatively little home suffering, or privation from the Mexican War, and so much apparent gain of territory of great value—that we have hardly brought ourselves, as a people, to think, of that War as we ought. But remembrancers—averaging rem many American born, Irish and other fellow-citi-

inhabitants of this country, different as they me by birth place, language, and customs, could not be furthered in a better and more efficient way than this, because "joy," says our Schille. "is the strongest spring in nature, and is moving the wheels in the big world-clock."

Many preparations are made by the committee, by the saloon-keepers and others in the signs of drowning; witness understands it to mean that water on the stometh and ones are the east. The target-shooters will have a pizze-shooter will have a pizze-shooter ing. The renowned marksmen of Switzerhand.

Tyrol and Bavatia may there emulate with the well-known bands of Hess, Schlemileh and others, and the quantities songs of the glee-ribbs will rejoice the ears of the masses; some of the most popular and humorous German sports will shake their dialoge, concussion, e.g., altogether; if the person was nearly exhausted, and should receive a severe him we der the abdomen, it could be likely to design and mother got up—diadr there was nearly exhausted, and should receive a severe him we der the abdomen, it could be likely to design and mother got up—diadr there was nearly exhausted, and should receive a severe him we der the abdomen, it could be likely to design and mother got up—diadr there was nearly exhausted, and should receive a severe him we der the abdomen, it could be likely to design and mother got up—diadr there was nearly exhausted, and should receive a severe him we der the abdomen, it could be likely to design and mother got up—diadr there were a dear the concursion of the brine, but we der the abdomen, it could be likely to design and mother got up—diadr there were a dear the remained of the house and not be fighting. The should be accounted for the would, he can are the concursion of the brine, but we derive the fight and the contains of the house and not be fighting and mother got up—fither and mother got up—fit blice and man-becoming exertions, will mightily add to the splender of the day. Messs, Mahr & Direct resunced.—Such a black spot might be Alfter will furnish gentlemen and ladies with the finest and purest refreshments of every kind, on the corposite side. Mr. Borngesser, has made up the corposite side. Mr. Borngesse lished firm by the quality of the refreshments, which he offers to the public, and especially his "Kossuth Bowl," whereby he defice all Temperance-men to try this beverage, and to find in it any damage for health or good behaviour, and 'that cannon' will be out too, and besides the roming of the gun, Mr. Becker will offer to the public, the much celebrated "May-wine," which is on delightful record, by every one who once made the tour of the Rhine at Spring time.

So the May feast may be nice, and ought to be a day of good "augurism" for the fraternization of all our citizens, American-born, or abroadborn, speaking the English, German or other language, and so to-day let us joyfully and broherly all had the May! JUSTICE,

We are amazed to find the subjoined agitating" paragraph in the Buffalo Courier of Friday week. We do not understand how such a horough going "finality" paper as the Courier is can lightly hazard the safety of the Union and the integrity of the "Compromise" by jesting on so delicate a subject :--

is How Opp ir Looks!—If we were in Greessia or even among the Turkeys, this would look natural, but as we are at home, and find it in that "model newspaper," the National Intelligencer, it looks sale looks odd:-For Sale.-An accomplished and handsome lady's maid. JENNY LIND'S LAST CONCERTS. - The closing Concerts of JENNY LIND in New York seem to ave aroused the enthusiasm and excited the admiration of both the press and the public, to the highest pitch. The tickets, though sold at three, two and one dollars, were eagerly sought for, and Metropolitan Hall was crowded to overflowing on both nights. No doubt Castle Garden at her final Concert on Monday last, was equally crowded The musical critic of the New York Courier, the best authority in that city, closes an eloquent and

appreciative notice of Jenny's second Concert The voice with which she works these wonders The voice with which she works these wonders is the worthy vehicle of such conceptions as hers. It is one which at each new hearing commands new admiration. Its power is overwhelming; its powers infinite. Its charms never pall. Frequent hearing only shows that "custom cannot stale its infinite variety."

It often seems unearthly, but its greatest charm is its fitness for the utterance of the purest and loftiest enoutions of the human heart; and at times it trembles on the very of the semijanental and is

loftiest emotions of the human heart; and at tumes it trembles on the very of the sentimental and is only restrained by the rigid purpose which guides it. Its charm is indescribable; it is the fascing iten of the Syren purified from its sensuousness. Surely such tones were never heard since Obernov "Sat upon a promonfory, And heard a mermaid, on a dolphin's back, Uttering such dulect and harmonious breath That the rude sea grew civil at her song; And certain stare shot madly from their spheres To hear the sea-maid's music."

FILLD'S PLOUGHING MACHINE.-The Beloit Jour nal publishes the following certificate to the valuable practical qualities of this machine, a notice of which has lately appeared;

Below, May 25, 1852.

We the undersigned, practical farmers and others acquainted with farming, having witnessed the operation of Messis, Gr. B. and Bers, F. Fireds, new Cylindrical Plowing Machine, regard with great interest and pleasure the introduction of this new principle into the mode of tilling the soil. We are satisfied that the principle is right, and that the machine can be made to work efficiently We are satisfied that the principle is right, and that the machine can be made to work efficiently and profitably; and we think those gendemon are entitled to great credit for their genius, energy, and penservance in bringing into practical opera-tion; and they certainly have our best wishes for later success, and an ample renumeration for their below and outlay in the matter. bor and outlay in the matter. There was no movement towards the Empire in France on the 19th. Louis Napoleon delivered a speech after the following is an extract;

The Roman Eagle was adopted by the Emperor for the last staking emblem of the regeneration and grandeur of France. It disappes ed with our misfortunes. It ought to return when France recovers from her defeats, and, mistress of hereif, no longer repudintes her own glory. Receive, then, soldiers! these cagles—not as a menace against foreigners, but as a symbol of our independency, as the sourenir of an heroic epoch, and as the mark of each regument of nobility, and swear to die, if need be, on those emblems which have so often led our fathers to victory. The accounts from the Continent show that there is no apprehensions of revolutionary movement at present.

The fluteemann Lettor. Washington, April 20.

On tay recent return from Havana, I found that the moment had arrived to fulfill the intentions of my government relative to my official connections with the government of the United States. nections with the government of the United States.

The Secretary of State has not judged fit to reply to the note which I considered it my duty to address to bite, dated the 13th of December, in relation to the reception and the military honors rendered to Kossuth by the federal authorities.

The Secretary of State had led not to hope that my interviews with him, in the State Department, would be no longer commented upon, and accompanied by derisive remarks, in certain journals of Baltimore and of Philadelphia. These assurances which were given to me in writing, have been insmediately burlesqued in the same journals, and have only led to more virulent attacks, which were communed in one widely circulated journal of New Orleans. And, on my passage through that city, I have been the object of very disagreeable demonstrations. I considered it my duty at that time-21st of November—to inf run the Fresident of these annoyances, so singularly patronized and thereupon the Secretary of State declared to me-28th November—that thenceforth his relations with me should be bad only in writing.

On the 7th of January, the Secretary, of State

his relations with me should be had only in writing.

On the 7th of January, the Secretary of State judged fit to pronounce publicly, and in the presence of Kossuth, a revolutionary speech, in which he strendously encouraged Hungary to a new rebellion, and formulty proposed a sentiment to the speedy emuncipation of that kingdom. This demonstration was of such a strange character, was so contrary to the simplest international courtesy, as well as to the positive promises which you have given me in the Department of State, that I considered it my duty to address mysolf to the highest authority of the republic, to be assured whether this discourse was the expression of the gentiments of the government of the United States.

entiments of the government of the United States.

I esteem it a happiness to be enabled to say that the imperial government, approving my course, has rendered justice to the declaration which the President decined it proper to make to me on the 18th of January, with the design of maintaining the good connections existing between Austria and the United States.

These verbal assurances have not given place since to any proceeding of the Secretary of State, to corroborate officially the declaration of the President, and to produce a satisfactory recombination.

President, and to produce a satisfactory reconstruction.

After having determined with much deliberation, as to the bostile proceedings of the Secretary of State, and after having experienced the false and disagreeable position which had resulted three-from. I believed it to be my duty to declare, for very evident motives of propriety, that my government would no longer permit no to remain here and continue official relations with the principal promoter of the Kossuth episode, 50 very

Dr. John W. Braper, Professor of Chemistry, in the Medical College of the University of New York, in this "Text Book of Chemistry," page 3-6, says, "It has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

Dr. Carpenter's standard work on Physiology, which is in the library of every Physician, and it used for a Text-Buok in all the College, it tall of evidence standar to the rapper respecting the re-braicable Digestive power of Pepcha and the fact that it may be readily separated from the stomach of the entire of one and used for experiments in Artificial Dice show, or sea remedy for disease of the Stomach, and dealcent secretion of Gestric Juice.

All undean wells on Chemistry, Materia Modica, and Physiology, and all youd Medical Dictionaies, describe the elementer and properties of Persus, and state many interesting details respecting it.

The fact that an Artificial Digestive Fluid, or Gastric Juice, perfectly resembling the natural fluid, may be readily upserpred, does not admit of question. The only wonder a, that it has not before been upile to the cure of indigestion and Dyspopela—so naturally does such a use suggest taglite the utind. Exeven Sarra of different makers consumed, with their ontents 1. The Safe made by Rich & Co. defied the flames and brought out its contents without a mark of fire upon THE SIRE IN FIRECHER AND PLANESSIS, NEW YORK.

MR. GILLBERTS LETTER.

THE SIBL IN LIEUCHER AND PLABENS, NEW YORK.

New York, Dec. 20, 1851.

Mears, Strauws and Markin, successors, to C. Bitch & Co., No. 146, Water Street, New York—bits, when the fire was consuming my place of Dusiness, No. 216, Penri Street, I was absent in Kensidaer County, testing a new cleaning apparatus in connection with my Excelsor Thrusher, and did not read the account until I was fearful it was too let to sake my books which were placed in one of your safes, purchased from Mr. March some years ago. My forswers not allayed when I found it necessary upon my return to apply the Croton Water & Hours before I was enabled to form and application to rule the Sakumader from its ashy bed. You may judge of my analety during this delay, and my agreeable curricke upon opening the safe in the presence of an number of gentlemen, to find my books and papers aved, and as legible as they were previous to the fire. The intonse heatro which the Sakumander Jown in the processor of the safe of the safe. The intonse heatro which the Sakuma subjected, can be conjectured from the condition of mother safe, (not a Salumander) of which an iron skeleton frame only remained, and not a vestige of a book. They were companions in the same office, on the second floor, from which they fit upon crates of carthen ware in the cellar, the ruined and upon the Sakumander. If their position had been reverted, not even the skeleton would have remained. My loss over the insurance is £1,909, yet the salumino of my books in your Sakumander, with the representatives of \$100. On, and important courners which could not be duplicated, has fully compensed me.

It will afford me great pleasure to exhibit the new safe purchased of you, and explain its merits, at my present offers, No. 1812.

The undersigned I now Released in two processors of feet, No. 1812, the office of the preservation of their books and the interferent Mr. Gibert's safe with the books undetweet, which he has kindly permitted to remain for the satisfaction and gra

HAWKINS' STAVE DRESSING MACHINE. PATENTED JULY 22, 1851.

THIs machine is now in successful operation at the shop of Wen. Hawkins in this city, and will dress Staves for Packing, Flour and Whiskey BARRELS,

and PIPES or HOGSHEADS, at the rate of 600 Whiskey or 800 Flour Barrel Staves 660 Whiskey of 800 Flour Barrol Slaves
PER HOUR,
straight, winding or crooked. In fact, any stave that can
be worked by hand will be dressed by this machine, either
for sight or slack workform 25 inches to 72 inches in length
of any reasonable width, and to any requisite bitge, and in
the most perfect mainter. The stave passes through the
machine a single time, is dressed by rotary cutters and is
them ready for the true shoops. The dresstag of the sides
and jointing of the edge of the stave is performed perfectly.
The machine is made of iron, is strong and durable, and is
not difficult to keep in good order for use. Six horse power
is sufficient to drive the machine with all the speed incessary. The Subscribers having purchased of Wm. Hawkins the patent right for the United States are propored to sell rights for States, Counties, or for rounding single machines and to found so up the machines, warranted to perform perfectly. In the great scaling of expense of transportation of tree-sed over the rangil state, the rapidity and perfect manner with which it performs its work, consists the value of this machine.

Satisfactory testimonials can be furnished if desired.
